CAREER OBJECTIVE

I am building my career as a full-stack developer with a strong focus on creating scalable, high-quality web applications. I enjoy working across both frontend and backend—turning ideas into complete, well-structured products using modern technologies. My goal is to take ownership of features end-to-end, solve real-world problems through clean and efficient code, and continuously improve my technical and architectural skills. I aim to contribute to teams that value quality, collaboration, and impactful software development.

ACADEMIC HISTORY

**Central Campus of Technology
Tribhuvan University, IOST**

Dharan-14, Sunsari, Nepal

Bachelor of Science in Computer Science and Information
Technology (BSc.CSIT)

2022-2026

WORK EXPERIENCE

Junior Full Stack Web Developer

Information Care Pvt. Ltd. Nepal, Kathmandu, Nepal

February 2025- Present

- Assisted in the development and maintenance of web applications using frontend and backend technologies
- Supported backend development by implementing APIs and business logic under senior developer guidance
- Learned to work collaboratively with team members and delivering the features on time.

PROJECTS

Notify

Node.js, Express.js, PostgreSQL, React.js, Prisma

- Built a notification management app enabling users to create, schedule, and manage alerts and notes, with a focus on usability, performance, and clean application architecture
- Created user authentication for secure login, signup and reset-password.

E-Commerce

Node.js, Express.js, MongoDB, React.js

- Developed a full-stack e-commerce web application with a separate frontend and backend architecture, enabling users to browse products, manage carts, authenticate securely, and place orders through RESTful APIs.
- Implemented scalable backend logic using Node.js for product management, user authentication, and order processing, while integrating a dynamic frontend for a responsive and user-friendly shopping experience.

Chiurika - CMS

Typescript, React.js, PostgreSQL, GraphQL, Express.js

- Assisted in configuring a static website of Chiurika into a dynamically content managing system(admin-based), enabling them to manage the content of the website.
- Used GraphQL to reduce the network and bandwidth load. Dividing the same data into different slices provided to both admin and public UIs.
- Worked collaboratively with the project members to deliver the project in time.
